# AI use case examples

*«If I had an hour to solve a problem, I'd spend 55 minutes thinking about the problem and 5 minutes thinking about solutions»*

– Albert Einstein

# AI solutions that deliver results and are in use

## DJINN (for Polaris Media ASA)

Finds news stories in public data sources for journalists

80%  
reduction  
in research-  
time

## AURA (for EFTA)

Streamlines the work of legal experts with EU legislation for the EEA

Simplified  
workflows  
+  
Significant time  
savings

# Results

Common across Visito's AI projects is that they free up time, simplify complex tasks, and increase insight  
→ more joy in everyday work

Reduce research time

## 50-80%

less time to find the  
"needle in the haystack"  
in large datasets

Removes time thieves

## Simplifies

complex workflows,  
makes demanding tasks  
easier to handle

Improves quality

## Enhances

accuracy and reduces  
the risk of manual errors

# AURA

How AI helps manage EU legislation in EFTA

# Outline of the incorporation process

1. EU drafts new legislation

2. EU adopts new legislation

3. Secretariat: Identification and preliminary assessment

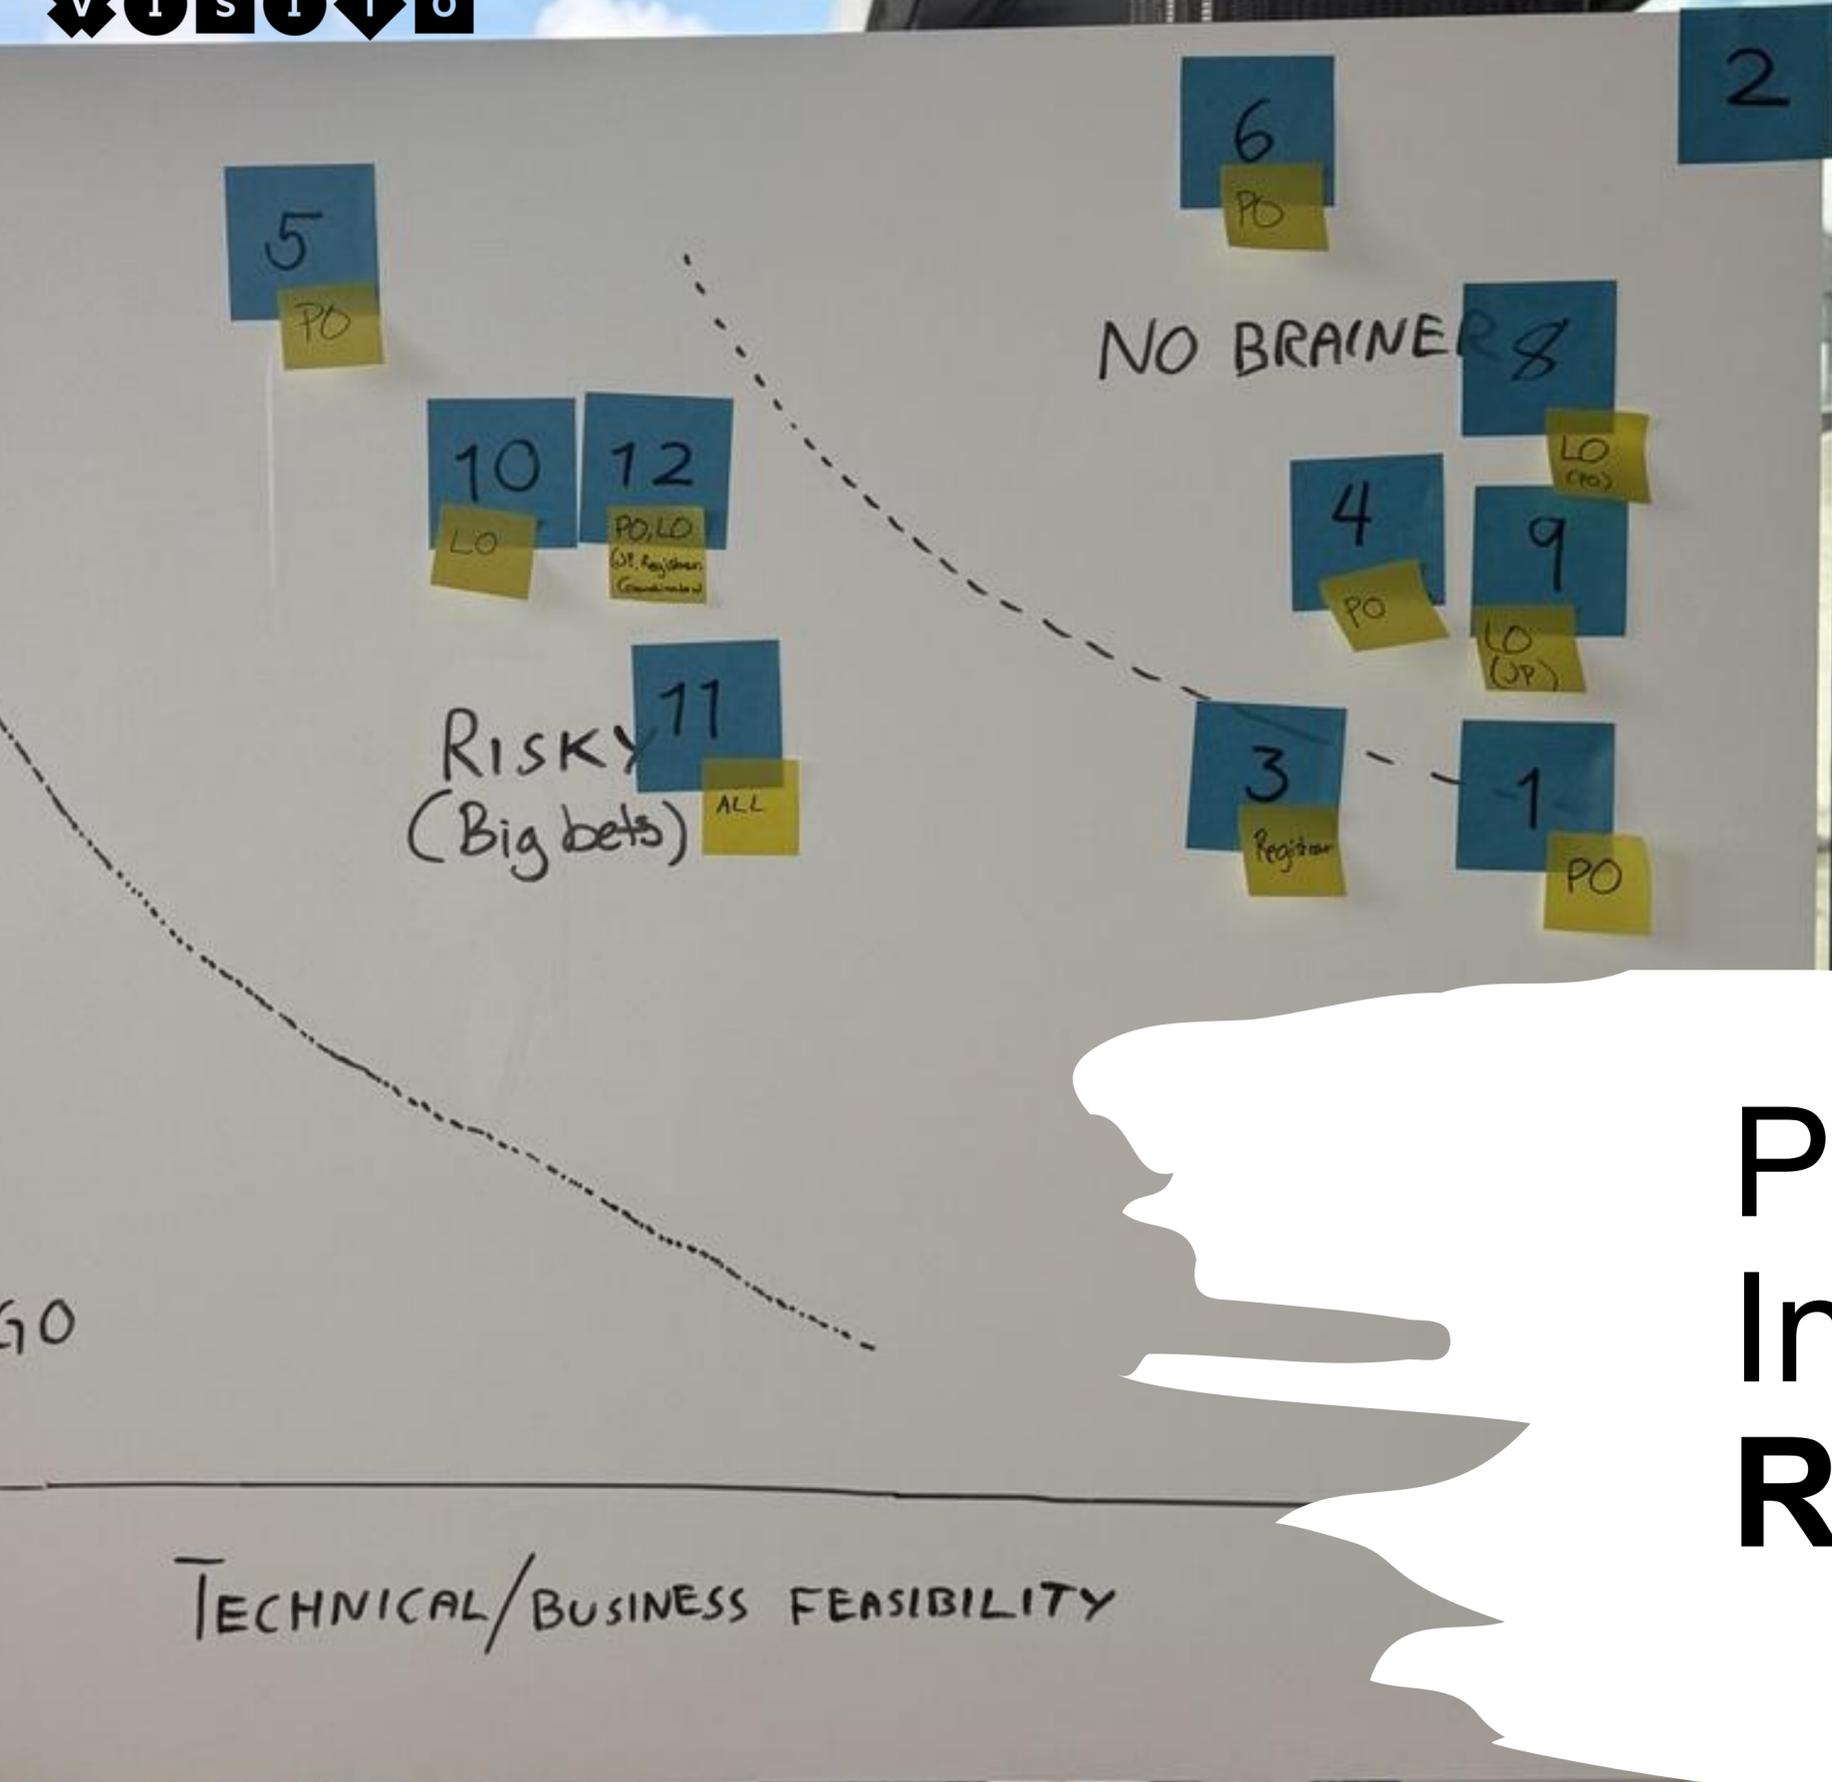

4. EFTA states: Relevance and need for adaptations

5. Secretariat: Drafts decision for incorporation

6. Negotiations with the EU

7. EEA Joint Committee Decision (JCD)

8. Implementation in the EFTA States

# Prioritization of Initiatives for MVP Recommendation

Automatically Identify Relevance for the EEA Agreement

Retrieve and make data available from all EU archives

New Chat

Chat 24 Jun at 09:33

Hello! I am an AI assistant. Ask me anything about Joint Committee Decisions that have been published between 2012 and 2024, and I will try to assist you. I have access to most adopted JCD's in this time period, including Annexes. More documents will be added in future updates.

You can ask me about specific JCDs and everything that is mentioned in these documents. Please provide extra details and ask clearly in full sentences what you are looking for. I do not have access to the legal texts that are referred to in the JCDs.

Click on "New Chat" in the top left corner to start a new conversation. Sometimes, this could help to get a more accurate response. Existing conversations will be stored in your browser. In the top right corner, you can go back to previous conversations and edit their names or delete a conversation permanently.

24 Jun 2025 at 09:33

Tell me about JCD number 173/2024

24 Jun 2025 at 09:33

JCD number [173/2024](#), adopted by the EEA Joint Committee on July 5, 2024, amends Annex XIV (Competition) of the EEA Agreement. This decision incorporates Commission Regulations (EU) 2023/1066 and 2023/1067, which pertain to the application of Article 101(3) of the Treaty on the Functioning of the European Union. Specifically, these regulations address research and development agreements and specialization agreements.

## Høringsuttalelse ny sentrumsplan, sak.2023/2519

Bodil Strand Jonsmyr kommenterer på den nye sentrumsplanen for Drangedal, som inneholder en ny reguleringsplan for sentrumsområdet. Hun har en negativ innstilling til planen og mener den vil ha negative konsekvenser for den gamle bebyggelsen og den visuelle inntrykket i nedre del av sentrum. Hun anbefaler kommunen å endre planen og å legge til rette for gode forbindelser mellom Toke Brygge og sentrum, samt å bevare grønne lunger og lekeplasser. Hun stiller også spørsmål om hvor stor andel av villt dyr det er i området og om det er noen risiko for oversvømmelse eller jordskred.

## Uttalelse til kommunedelplan

Elisabeth Sundby har skrevet inn høringssvar på kommunedelplanen for Prestestranda i Drangedal. Hun peker på tre forhold som hun mener bør tas ut i planen:

1. Oddeåsen bør ikke brukes til boligformål, da det er et svært verdifullt friluftsområde i sentrum av Drangedal.

# Djinn - Results

## Time Savings

Previously it took 1–2 hours daily to review all new data. Now it only takes 10 minutes.

## Simplified Workflow

The work used to require extensive experience and expertise. Now even less experienced journalists can perform the job quickly and effectively.

## Improved Accuracy

Users discover information they would otherwise miss, leading to fewer errors. The solution uncovers investigative stories based on patterns in the data.

## Increased Relevance and Engagement

The solution helps users produce more and more relevant articles, increasing engagement among the newspaper's readers.

# SUJO - Demokratibasen

**SUJO (Center for Investigative Journalism)** - supports Norwegian media houses with projects, expertise, and tools to strengthen investigative journalism.

**Demokratibasen.no** is an AI-powered tool that collects and structures political documents from Norwegian municipalities for use in journalism and research.

Bergen kommune støtter revisjonen av veilederen og mener den i stor grad oppfyller formålet. Det gis innspill om behovet for tydeliggjøring av ansvarsforhold, tekniske krav ved fjerntolking, finansiering av tolketjenester og bedre tilrettelegging for døve, hørselshemmede og døvblinde. Forslag om effektive løsninger i samarbeid med private aktører og refusjonsordning for å sikre tilgang på kvalifisert tolk.

# Trusted RAG for Decision Support in Healthcare

V I S I T O

# AI Decision Support in Healthcare

## What:

- Doctors spend much time searching through medical documents for relevant information
- Process is manual, slow, expert-dependent, and sometimes inconsistent

## Process:

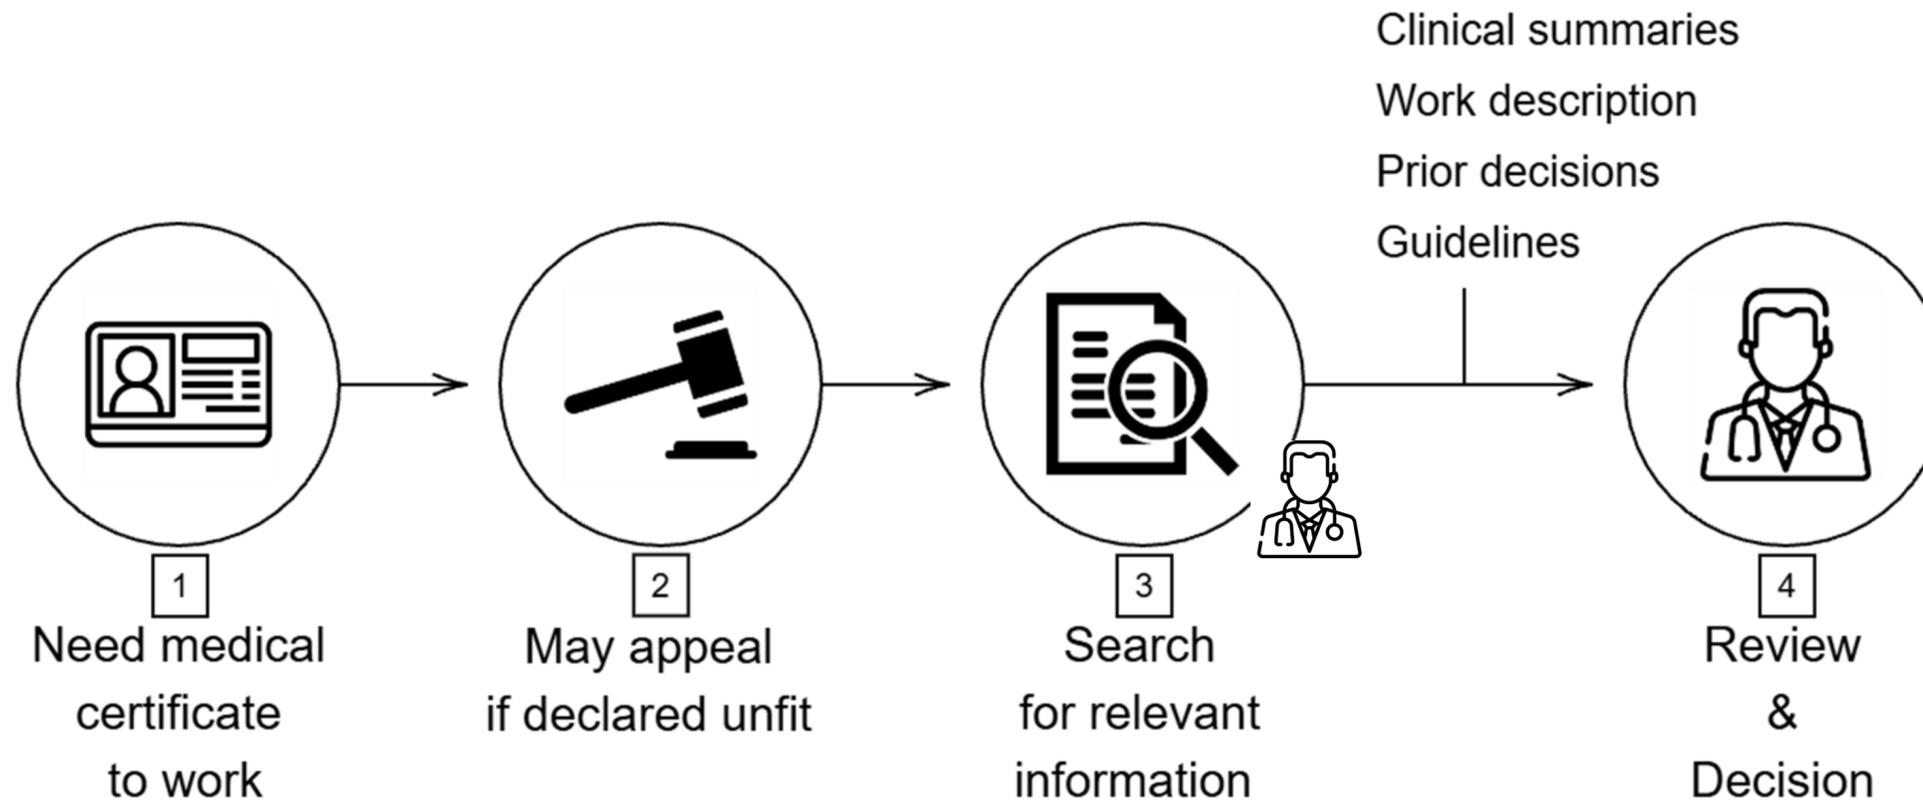

- Started with workshop to map workflows and pain points

## Outcome:

- Test if AI/RAG can securely support doctors and reduce handling time

# Workflow

# Manually searching through previous cases

- Too time-consuming
- Risk of inconsistency and missed factors
- We want to:
  - More time for patients
  - Fair, consistent decisions.

3

Search  
for relevant  
information

# RAG to the find relevant information

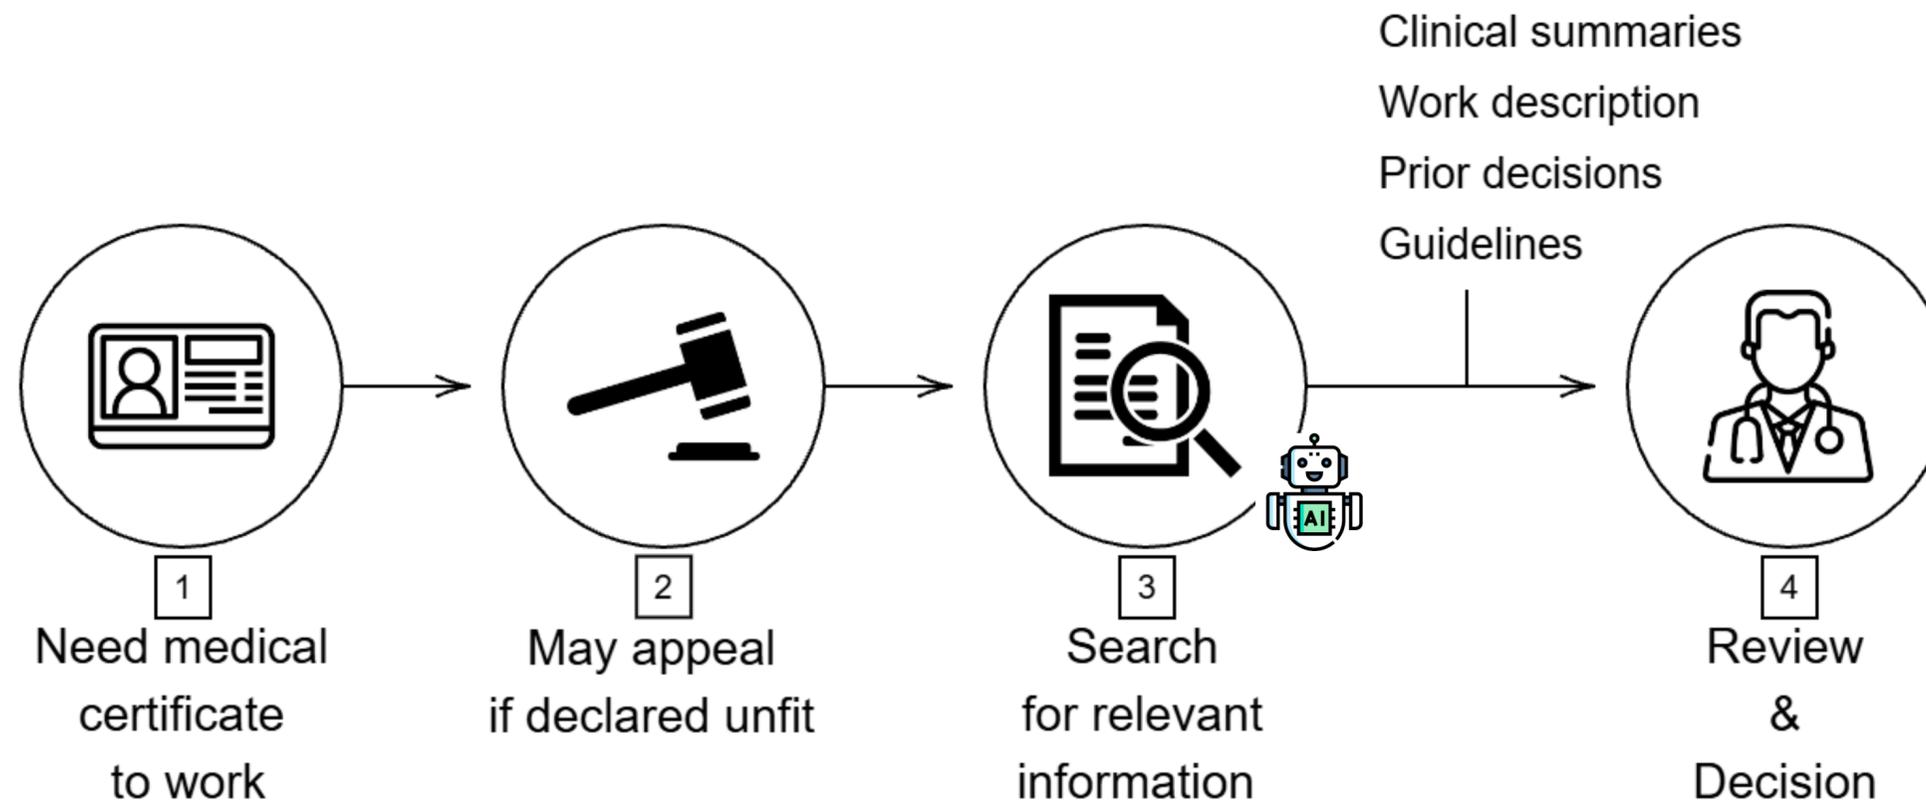

- Retrieves similar cases
- Present information
- Relevant information faster.

3

Search  
for relevant  
information

# RAG to the find relevant information

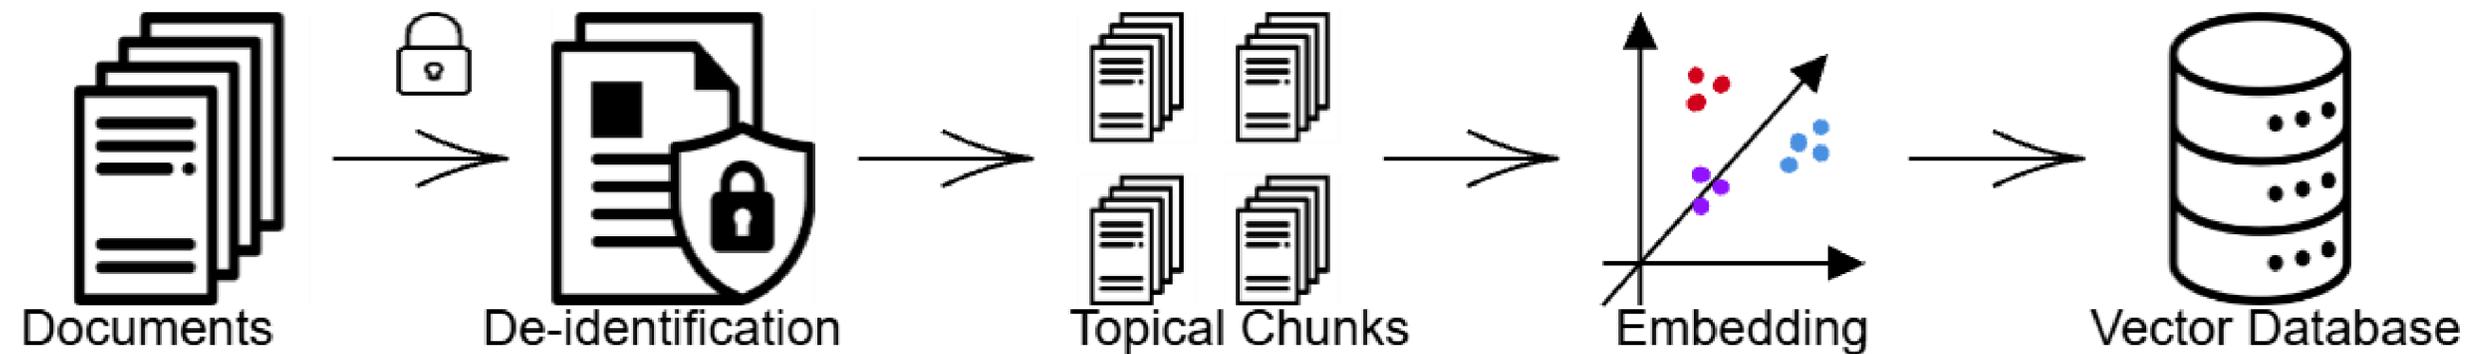

# PoC Challenges

- **Data access & anonymization** → need realistic test data
- **Privacy & security** → DPIA, strict environment control
- **Quality & relevance** → must not miss essential info
- **Trust & explainability** → doctors must verify sources
- **Business value** → proving that it actually helps doctors

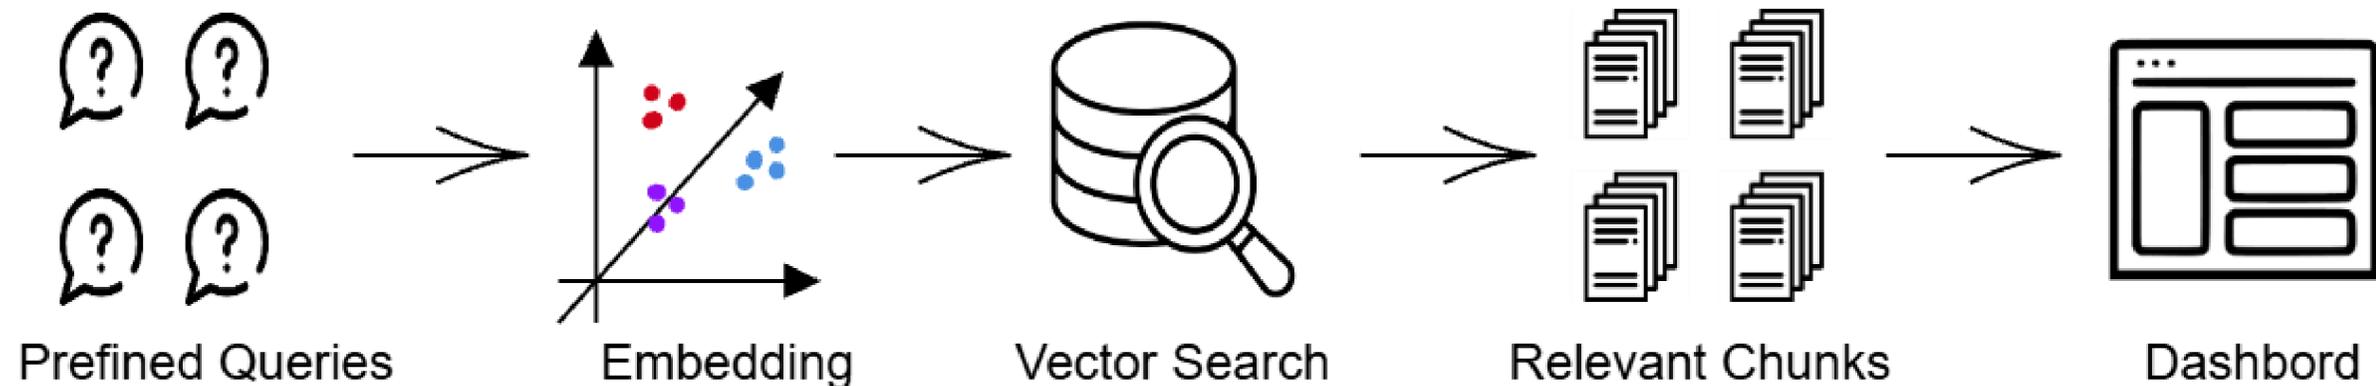

# Architecture & Data Flow

## Ingestion & Storage

---

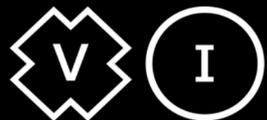

## Retrieval Augmented Generation

# Important next steps

*AI Trust & governance – from PoC to production*

- **Data & Privacy:** De-identified data pipelines for production.
- **Scalability:** Ensure same performance at real-world scale.
- **Governance & Compliance:** Monitoring & meet requirements.
- **Integration & Adoption:** Fits daily work, used by everyone.
